Cluj / Romania - +40747428289 - [ahmadaldali88@gmail.com](mailto:ahmadaldali88@gmail.com) - [LinkedIn](#) - [Website](#)

---

Product-minded Software Engineer with a passion for building tools that people actually use and love. My full-stack experience spans projects in finance, healthcare, education, and sports, where I've led the development of complex user management systems and dynamic product sites like AllMyFaves (TreeLink alternative). I thrive as a key contributor on mission-driven teams, bringing adaptability, initiative, and a strong problem-solving mindset. I proactively fix bugs, iterate fast, and constantly push myself to learn, currently diving into building AI agentic tools to stay ahead of the curve.

## Experience:

---

### Front-End Developer @Yoboo Health (Belgium)

Dec 2023 - Present

- Building the flagship product for Yoboo, a wellbeing web app with multiple user types & interfaces.
- Engaging in daily meetings with the team to optimize the development process.
- Working directly with UI/UX designers and converting the designs to fast front-end web pages.
- Providing rapid support for service desk tickets, addressing front and backend issues.
- Developing a flexible, user-friendly, and responsive application that adapts easily to frequent changes in workflow.

### Full Stack Developer @Greppy Systems (Romania)

March 2022 - Dec 2023

- Developed and maintained web services and interfaces.
- Contributed to both front-end and back-end development, enhancing overall apps functionalities.
- Created new APIs and effectively utilized AWS services to improve system performance.
- Wrote tests, troubleshooted issues, and resolved bugs to ensure software reliability.
- Seamlessly migrated Database technologies to ensure uninterrupted site uptime.

### Software Engineer @ZEOUR LTD (UK)

July 2019 - June 2022

- Developed a full System (Queue Management System) from scratch to end according to SDLC.
- Developed multiple applications within QMS for employees, customers, managers, and admins.
- Integrated the system with an SDK keypad device, a Digital Signage System, and a Feedback System for enhanced functionality.
- Developed a Self-Service Kiosk capable of accepting cash from users.
- Led a team of six members, driving project success through effective leadership and collaboration.

## Skills:

<b>Web Skills</b>	PHP - Laravel - JavaScript - Typescript - Svelte - VueJS - HTML/CSS - RESTful APIs - Python - Django - Houdini - GraphQL - DB Management - MySQL - MongoDB - TailwindCSS
<b>Digital Skills</b>	JAVA - Dart - Flutter - Chrome Extensions - OOP - Design Patterns - Agile - Git - Jira - Linux - AWS - Apache - Nginx - Backend - Frontend - Figma
<b>Soft Skills</b>	Problem solving - Googling - Fast Learner - Work Under Pressure - Collaboration - Communication - Leadership - Helping Others - Time Management - Support Services - Attention to details

## Key Project Achievements:

---

### Yoboo

Dec 2023 - Present

- Collaborated with over 40 B2P and B2B partners during my first year.
- Stepped into the front-end team lead role, maintaining project stability and ensuring no downtime during the transition.
- Implemented integrations with booking, payment systems, Smartfood recipes, and Storyblok.

### Allmyfaves

March 2022 - Sep 2023

- Achieved a remarkable reduction in homepage response time from 4.5 seconds to approximately 1 second, significantly enhancing user experience.
- Executed a successful migration of a legacy database (~10 GB, serving 500K users), ensuring data integrity and system reliability.
- Seamlessly transitioned to a new system version, migrating data, users, domains, and branding elements without service interruption.

### Sumeet Pro

July 2022 - March 2023

- Developed a Chrome extension that effectively transcribes and summarizes Google meetings.
- Created essential APIs for the extension, including dashboard functionalities and payment integrations, streamlining operations.
- Successfully deployed projects on Nginx web servers, ensuring robust performance and reliability.

### Queue Management System

July 2019 - June 2022

- Attracted over 25 clients in the first year of operation, establishing a strong market presence.
- Designed and developed a robust licensing system that generates a one-time use license to activate the system.
- Innovated the first Telegram bot for the Queue Management System, enabling ticketing and appointment bookings through a popular messaging platform.
- Developed eight interconnected applications as microservices with flexibility for standalone or centralized operation, enhancing system adaptability.

## Education

Master of Software Engineering and Information Systems.	2019 – 2021
Bachelor of Informatics Engineering.	2013 – 2018 (89.08% / 3rd place)
